

top 
swe
team

safe place
for your next
big thing

small by design. senior by default.

we are the top software engineering team aiming to help you launch your future project as efficiently as possible. we take on a handful of engagements at a time and stay close to the work — from a sketch on a napkin to the production deploy.

we work two ways: full build-outs from zero to production, and dedicated teams embedded inside our clients' product orgs. our engineers own the stack end-to-end — frontend, backend, infra, data, ai.
